Trade Electronically with Rite Aid

Rite Aid requires that all domestic and international suppliers support the electronic exchange of transactions in accordance with standards and specifications as noted in Rite Aid’s *Supplier Compliance Guide*.

Rite Aid policies are covered in the *Supplier Compliance Guide and The Supply Policy Agreement for Generic Pharmaceutical Vendors*. The policies specify that all suppliers accepting distribution center (DC) purchase orders are required, at minimum, to support the electronic exchange of purchase orders, advance ship notices and invoice transactions in accordance with EDI policy and procedures.

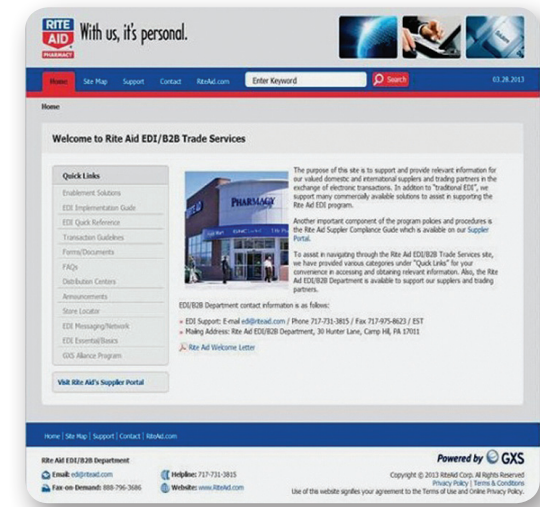

Direct-store-delivery suppliers are required to support, at minimum, EDI invoicing and in certain instances purchase orders.

Rite Aid Online Store drop ship suppliers are required to support a number of transactions as specified under Transaction Guidelines and in accordance with the Rite Aid Online Store Master Agreement.

In addition to ‘traditional EDI’, Rite Aid supports many commercial solutions for EDI enablement available to our trading partners in the electronic exchange. Each trading partner must evaluate the costs and benefits of the solution that best satisfies their business need.

Other transactions are available and exchanged in certain instances as Rite Aid deems appropriate.

EDI/B2B Trade Services

How to Get Started – Trade Electronically:

- Obtain Rite Aid's EDI/B2B profile, transaction specifications and Trading Partner Profile from the Supplier Portal or send an email request to **edi@riteaid.com**.
- Complete and return the Trading Partner Profile to Rite Aid's EDI/B2B Department.
- Contact the Rite Aid EDI/B2B Department to coordinate the exchange of the required EDI transactions.
- All trading partners are expected to be in compliance as noted within the Supplier Compliance Guides, Supply Policy Agreement, and Rite Aid Online Store Master Agreement.

The EDI/B2B Department should be contacted for enablement assistance, clarification of transactions, documents, mapping requirements, compliance errors and missing or duplicate transmission.
